

World of Workflows

World of Workflows is an azure hosted business process automation platform to help teams automate business processes, integrate AI into back end processes and reduce manual effort and errors in anything they do.

Key customer benefits

- Automate processes in your organisation and have these run automatically.
- Integrate with OpenAI, Azure, Xero and any other application.
- Work with your team with advanced task management!
- Extend to communicate with any application.
- Develop all of this with a low-code interface with drag and drop.

Use cases

- Automate time tracking.
- Generate customer facing content.
- Automate lead management.
- Schedule staff and drivers.
- Orchestrate long running processes.

Features

- Low code drag-and-drop designer for workflows.
- Inbuilt extensible and performant database.
- Integration with any Web Application or REST API.
- Extend with our library of plugins.
- Generate your own exportable IP with Solutions.

Target industries

- Education
- Government
- Financial Services
- Professional Services
- Manufacturing

Target customer

- Teams in large enterprises
- Medium Business

Objection handling

- We don't have developers.
 - Solution: World of Workflows has a low code/no-code interface. We find business analysts can become experts quickly and build robust solutions.
- We don't want data in the cloud.
 - Solution: World of Workflows runs in your azure tenancy, meaning the data is yours and not in a 3rd party SaaS tool.
- We don't want to pay more as we grow.
 - Solution: World of Workflows is a single price per Azure subscription meaning you can implement as many versions as you want.
- It's too expensive.
 - Solution: World of Workflows is priced at the equivalent of a FTE in a business. If you need a custom plan that ramps up as value is delivered, contact partners@worldofworkflows.com.
